

Bruin CAPS

Empathize

Mental health issues have become a pressing concern for individuals of all ages, particularly among young adults. Consider the stigma surrounding mental health and the barriers to seeking help, and design your prototype to foster a supportive and non-judgmental environment for young adults to connect, share experiences, and access professional guidance.

01.

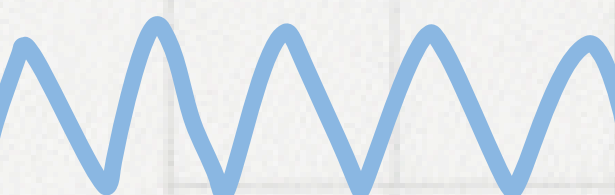

Increase in students seeking mental health services

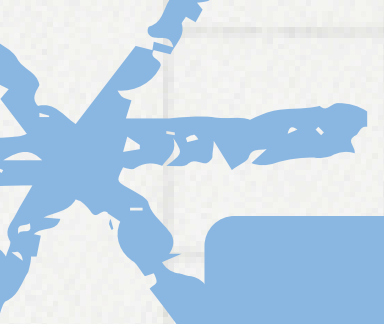

02.

Disparity in race representation of counselors

03.

Inaccessible mental health resources

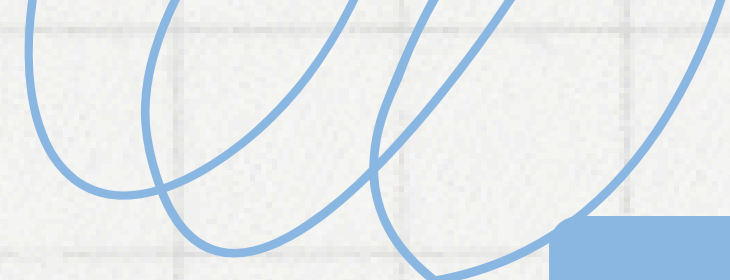

01.

–90% of counseling center directors reported an increase in students seeking services (2019)

–More than 60% of college students met the criteria for at least one mental health problem across 373 campuses nationwide (2020–2021)

02.

–White college students are almost **twice as likely** than Black students to get it, according to one study, which found that 46% of White college students sought mental-health treatment compared to 23% of Asian students, 26% of Black students, and 33% of Latino students.

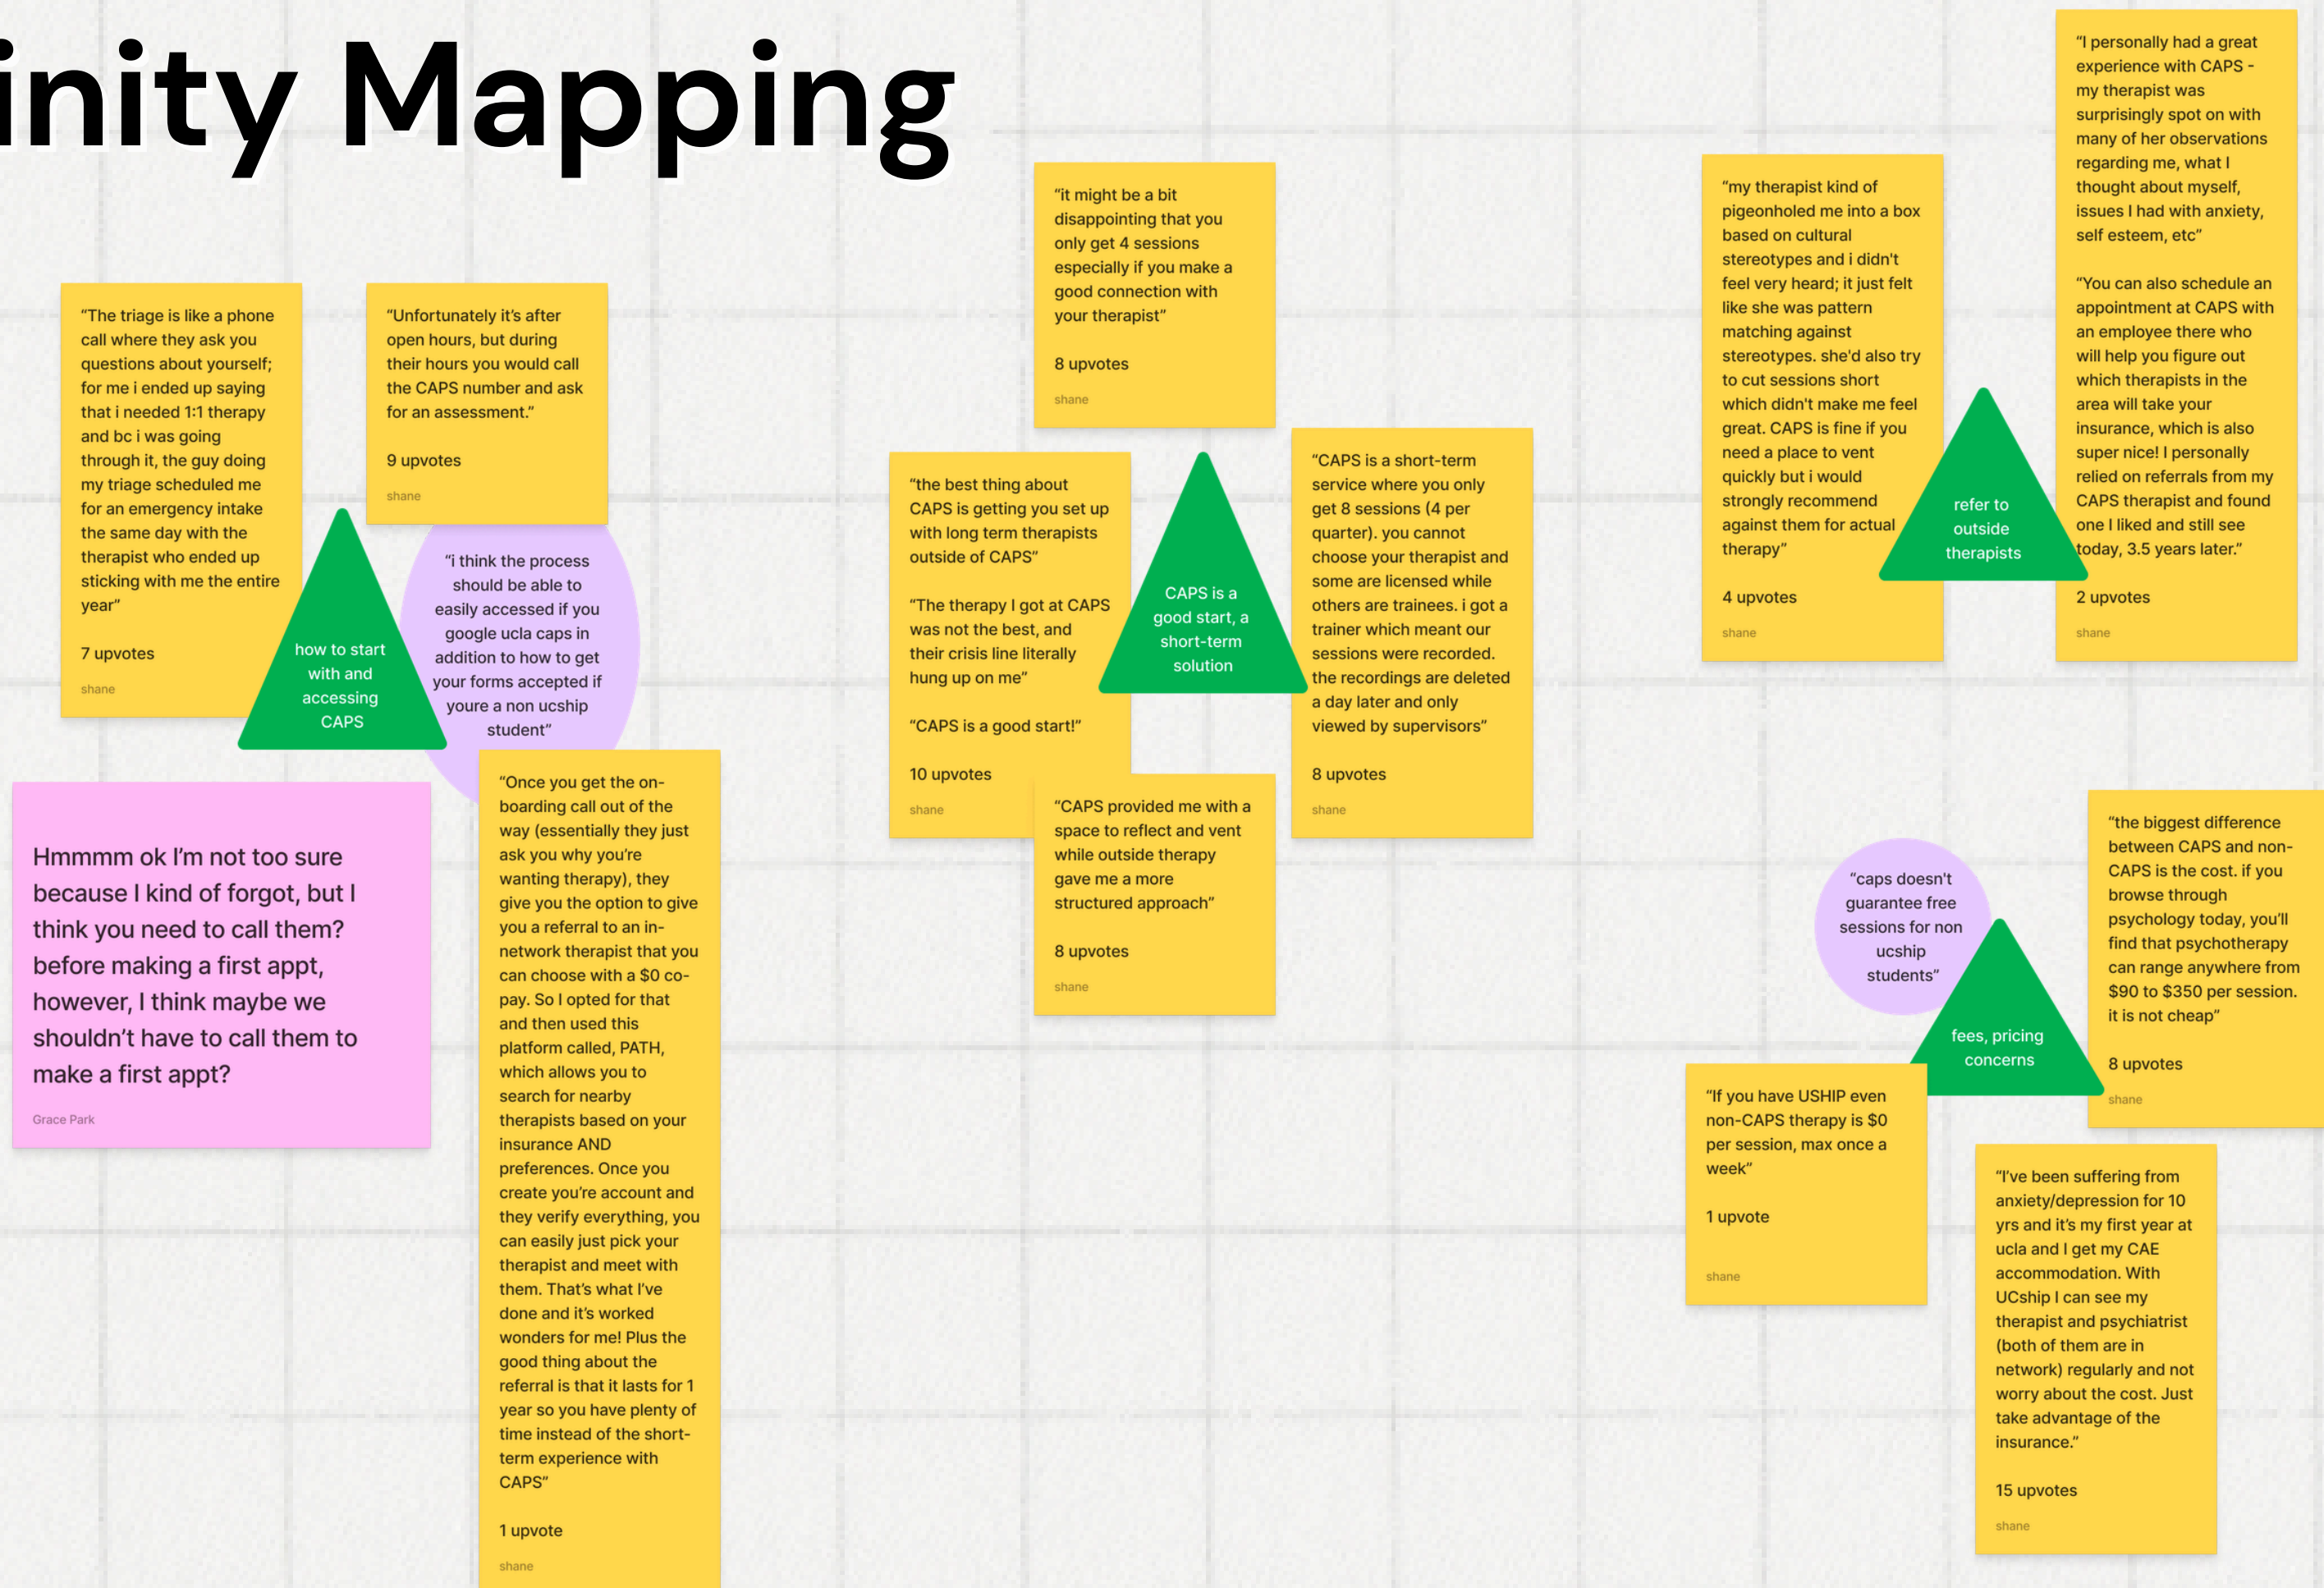

03.

–**81% of students surveyed** were aware that their school provides mental health services. But only 40% think their school is doing enough to support student mental health.

–Of the 46% of students who rated their mental health status as ‘fair’ or ‘poor’, just 20% sought help at school.

Affinity Mapping

Focus Point: Difficulty accessing CAPS

“The triage is like a phone call where they ask you questions about yourself”

Why is a phone call necessary for standardized questions?

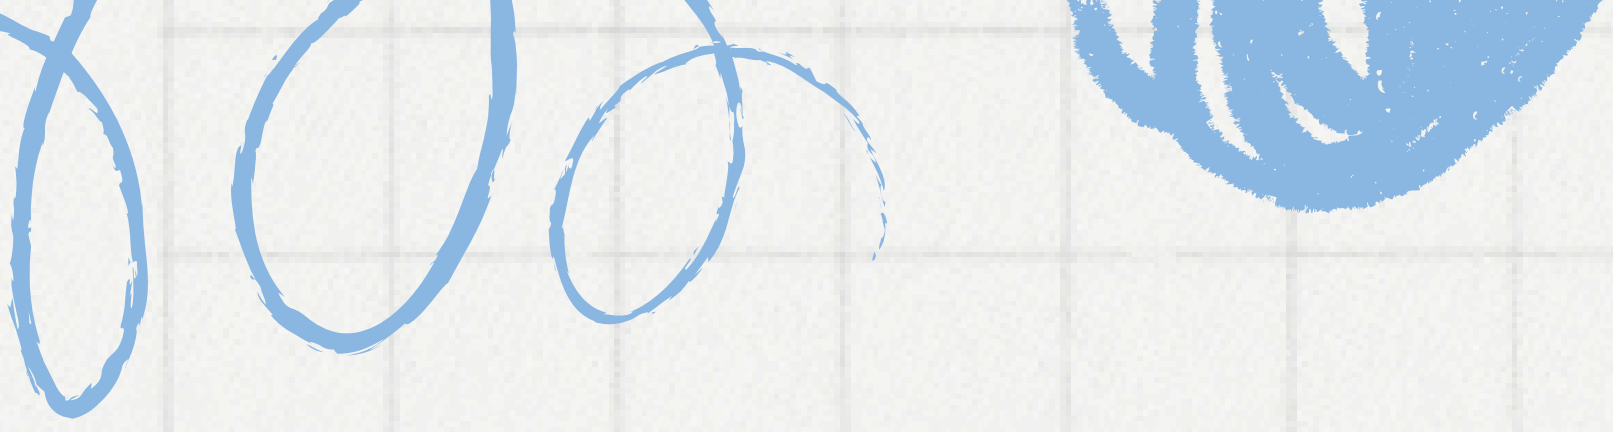

“Unfortunately it’s after open hours, but during their hours you would call the CAPS number and ask for an assessment.”

Cannot access outside of open hours

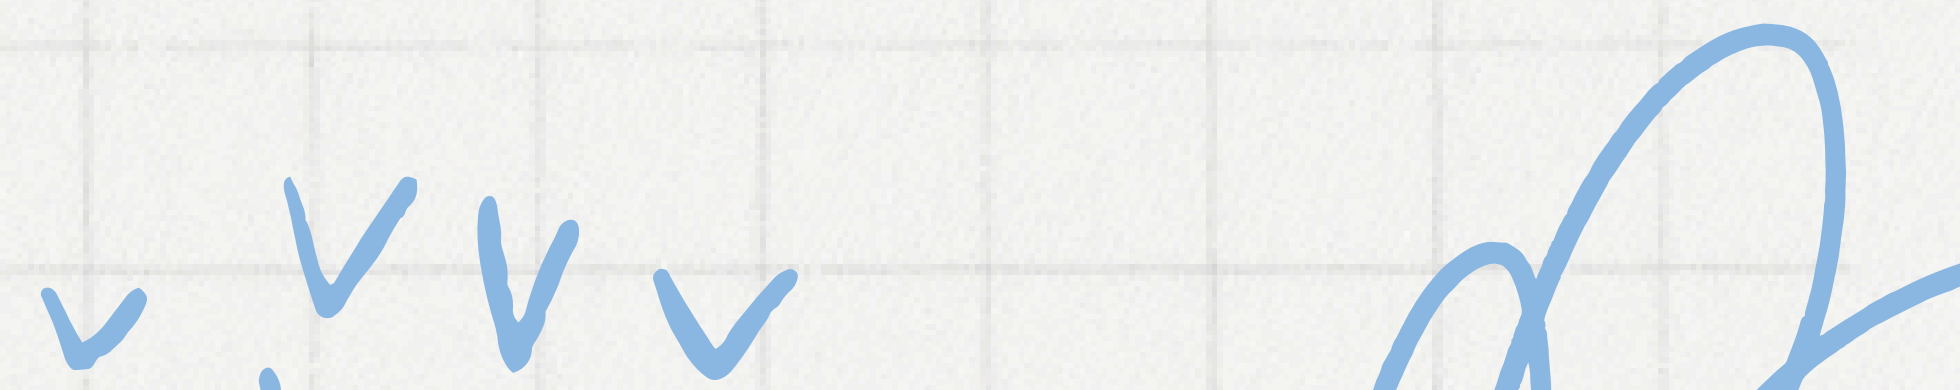

The background is a light gray grid. It is decorated with various hand-drawn blue doodles. In the top left, there are several overlapping circles. To their right is a scribbled circle. Further right are more overlapping circles. On the far right, there is a star-like shape and some horizontal lines. In the bottom left, there are concentric arcs. Next to them is a scribbled circle. In the bottom center, there is a wavy line. To its right are several small 'v' marks. On the far bottom right, there is a large, loopy scribble.

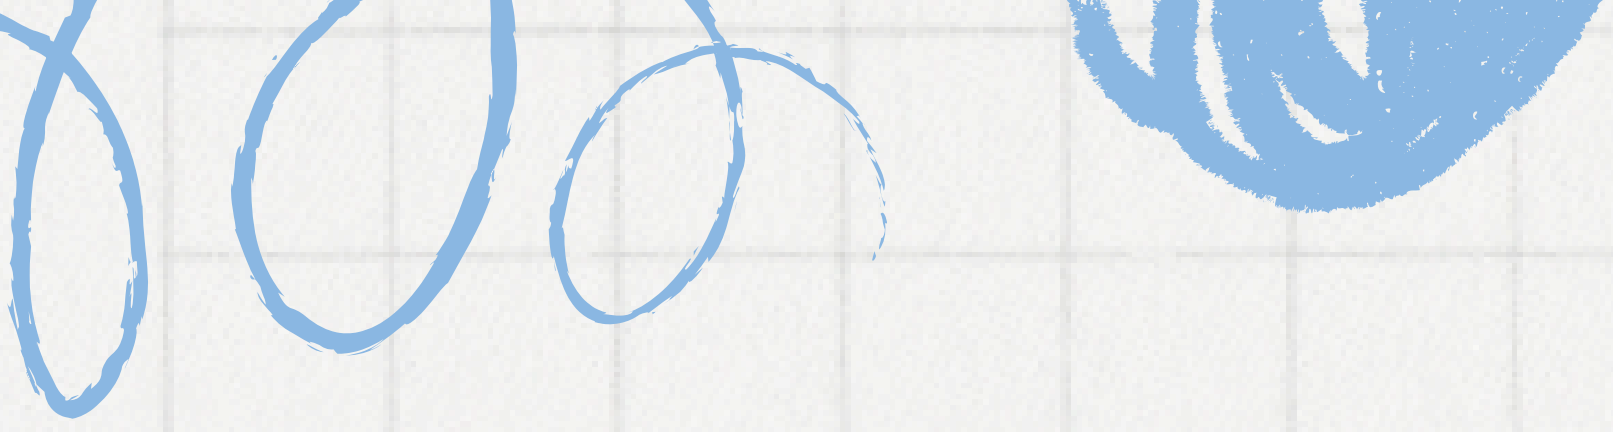

Define

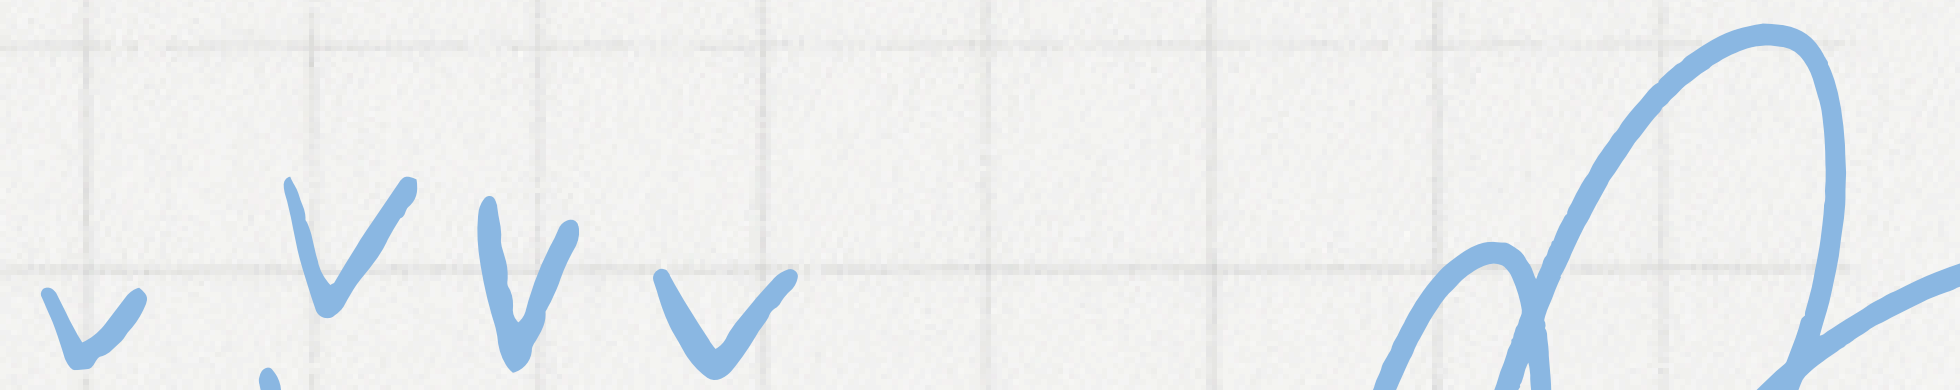

Problem Statement

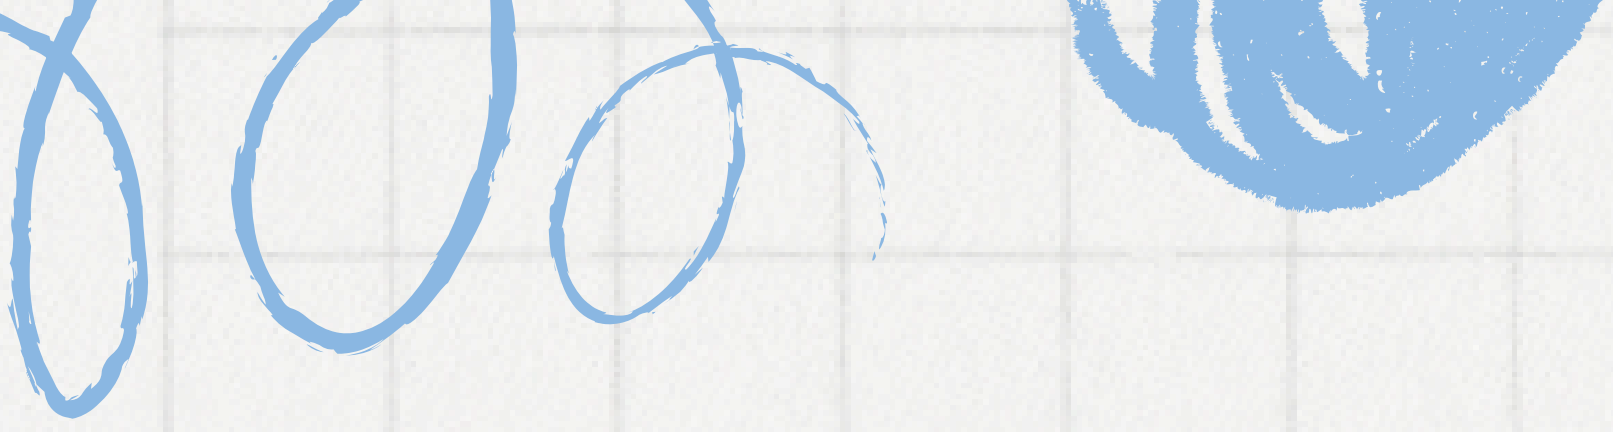

Since the initial process of seeking mental health care is **hard to navigate and intimidating**, we hope to make an online application that **connects students with mental health services** on campus with **accessibility and inclusivity** in mind.

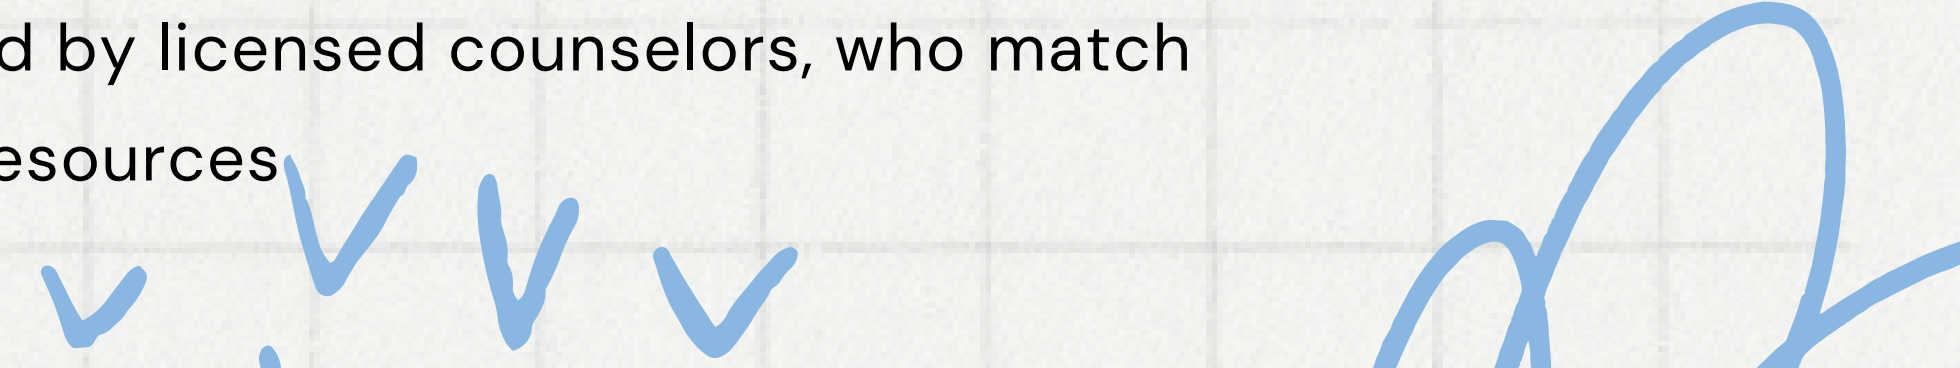

Current Barriers

- **Lack of privacy and discretion**
 - Need to discuss appointments in a waiting room with other students
 - **Inconvenience**
 - Must call on the phone or go to CAPS in person
 - Process is **complex and not streamlined**
 - Students are unsure of how to start the process
 - **Stigma prevents students from seeking help**, particularly those from certain backgrounds
- 

Our Solution

- Create an application that provide a digital space for students to seek help, reducing the possibility that students will be deterred due to stigma or embarrassment
 - Create a familiar, comforting mascot that guides you through the onboarding process
 - Steps to onboard can be streamlined by keeping everything on the app
 - User responses and preferences are reviewed by licensed counselors, who match students with personalized suggestions for resources
- 

User Persona

Kaashvi Singh

| **Age:** 20

| **Location:** Los Angeles, CA

| **Occupation:** Full-time College Student

| **Pronouns:** She/Her/Hers

| Bio

Kaashvi Singh is a 20 year old college student who is very busy due to her academic course load, extracurriculars, and her part-time job. Combined with the constant deadlines and responsibilities in her life, she's also experiencing struggles with her mental health. She often feels hopeless and stressed, struggles to get out of bed, and does not feel motivated to do anything.

| Personality

- Hardworking
- Diligent
- Studious
- Actively tries to manage her time efficiently

"I want to seek support for my mental health, but I am scared of the process and not sure of how to take the first steps in finding a therapist and scheduling appointments."

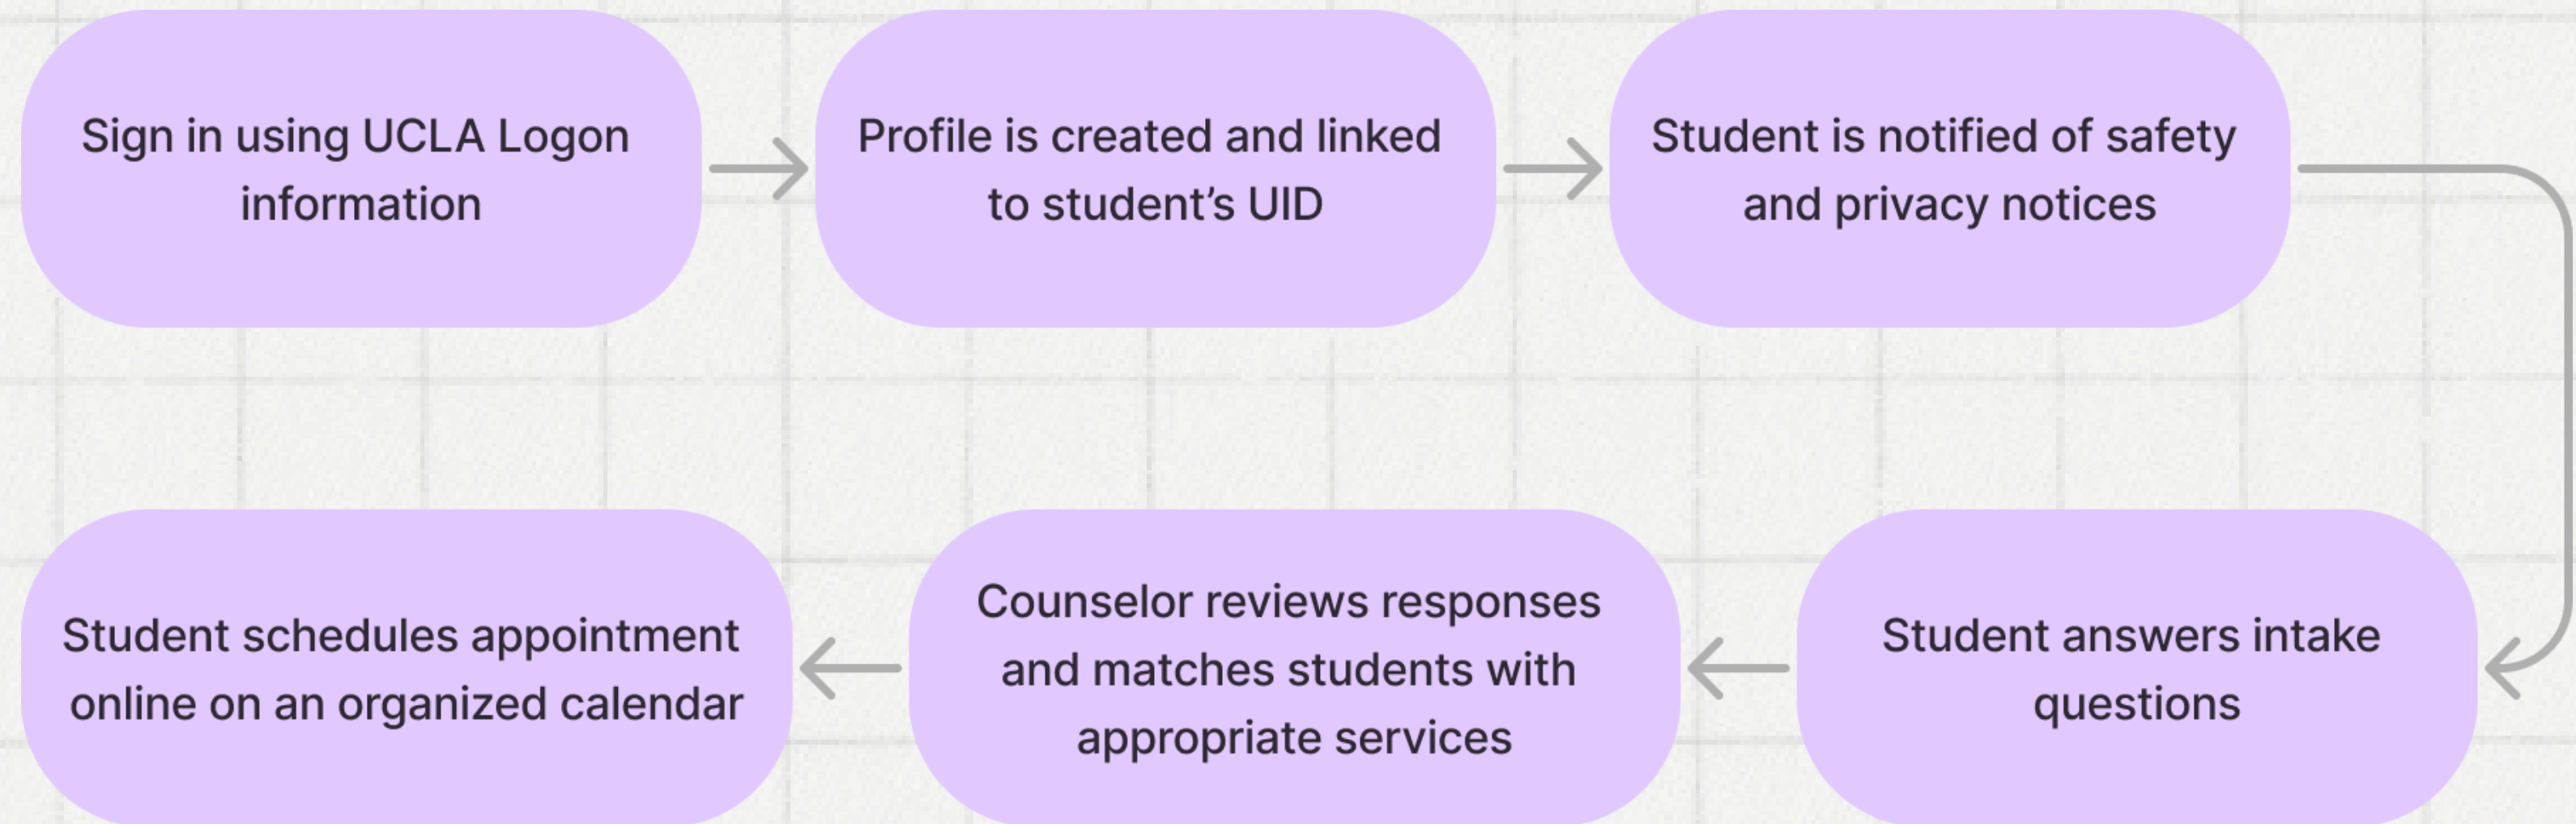

| Needs

- **Inclusivity:** wants to be able to find a suitable therapist based on personal preferences
- **Accessibility:** wants an easy and straightforward process of scheduling an counseling appointment
- **Affordability:** as a college student, she wants to be able to access the campus mental health resources that are more affordable than outside resources

| Frustrations

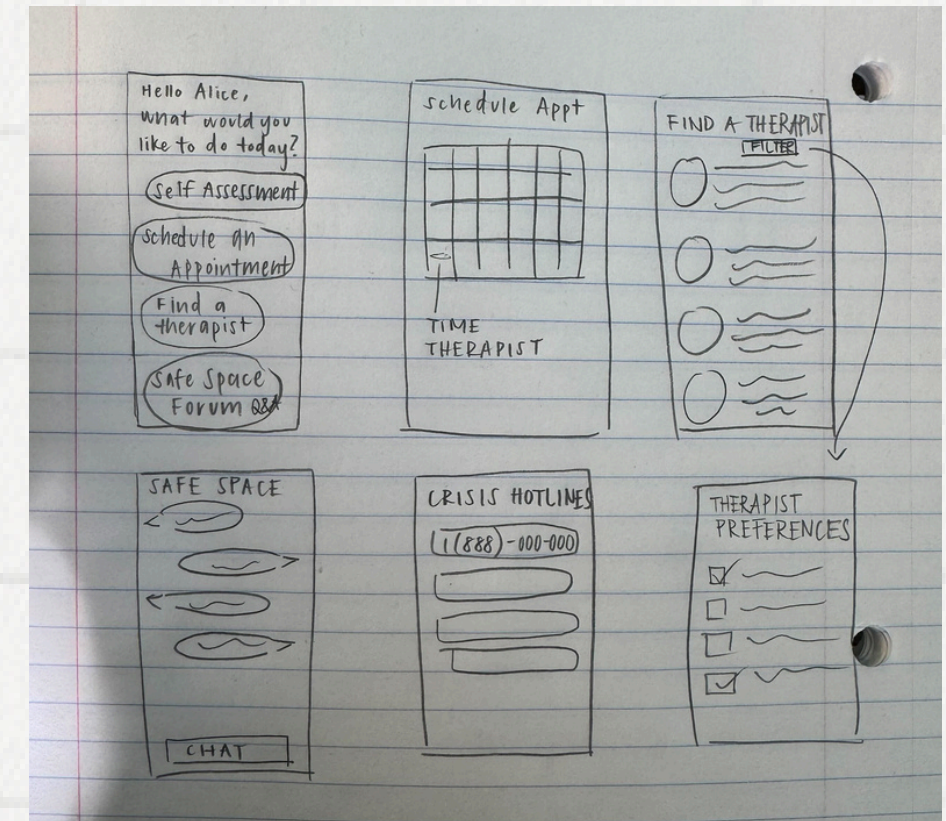

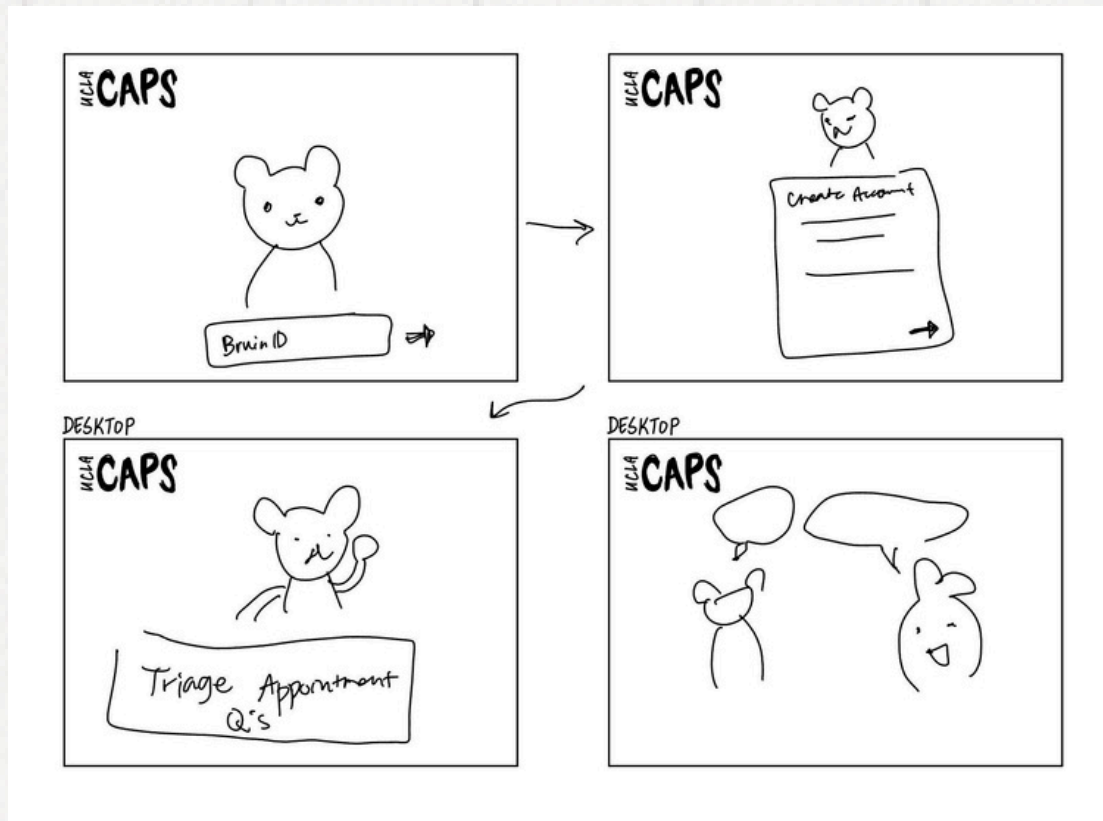

- **Navigation:** users are lost and confused on how to navigate through the process of seeking campus mental health services
- **Lack of personalization:** finding the right therapist that suits user's needs is difficult
- **Confusing process:** users are not sure of the process of getting CAPS services

User Flow

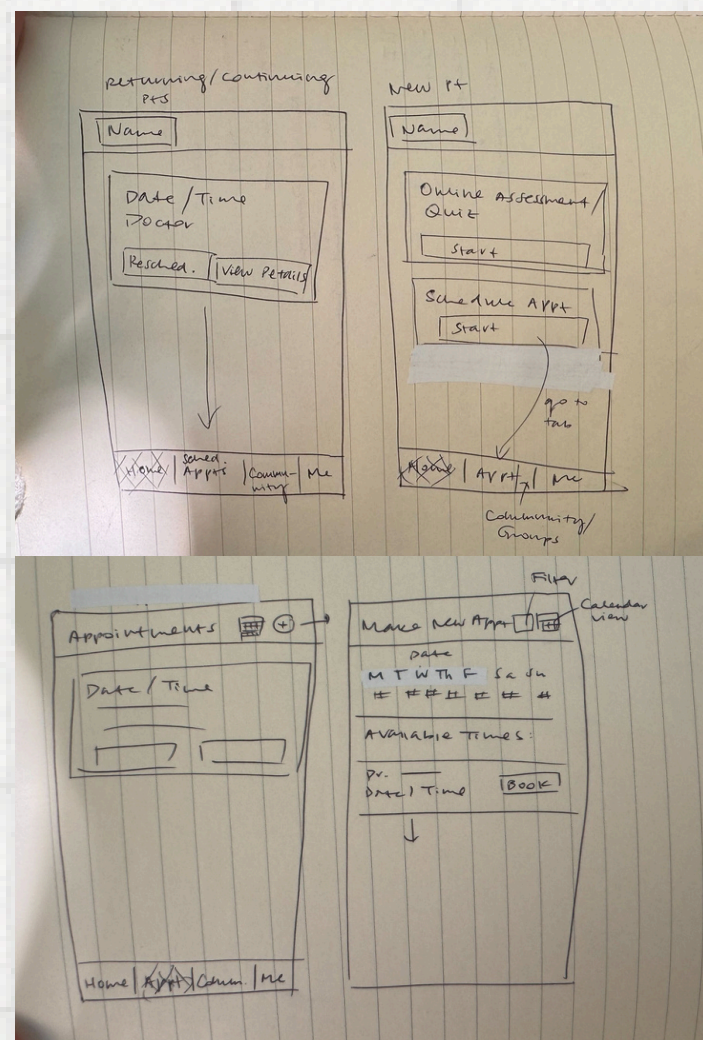

The background is a light blue grid. It is decorated with various hand-drawn blue doodles. At the top left, there are several overlapping circles. To their right is a thick, scribbled blue circle. Further right are more overlapping circles. On the far right, there is a star-like shape and some vertical lines. At the bottom left, there are concentric arcs. Next to them is a scribbled blue circle. In the bottom center, there is a wavy line. To its right are several small 'v' marks. On the far bottom right, there is a large, loopy scribble.
